stability.ai

Prompt: Create a relaxing atmosphere with the use of plants and other natural elements, such as a hanging terrarium or a wall-mounted planter. Include plenty of storage options to keep the space organized and clutter-free. Consider adding a vanity with double sinks and plenty of drawers and cabinets, as well as a wall-mounted medicine cabinet and towel storage. SDv2.1-768

Stable Diffusion

Stable Diffusion is a revolutionary open-source creative tool released on 22 August, 2022, which has gained rapid adoption around the world. Stable Diffusion can be used to generate images through natural language processing.

This prompt book has been created as a free-to-use, visual guide to explore and accelerate your own creativity with Stable Diffusion projects through the use of natural language.

Stable Diffusion v2.0 was released 23 November, 2022 by Stability AI.

For more information visit [Stability.AI](https://stability.ai) and follow us on [Twitter](https://twitter.com/stabilityai).

All images in this deck were generated with Stable Diffusion v2

stability.ai

Prompt: a hyperrealistic painting of crashing waves sprays of water particles splashing on rocks at sunset, intense, epic, exciting, wow, panoramic, cinematic, moody, hdri, lens flare, exciting, 3D, stop motion, highly detailed, octane render, soft lighting, celestial, professional, 35mm, Zeiss, Hasselblad, Fujifilm, Arriflex, IMAX, 4k, 8k

Prompting

A prompt is a word, a phrase, or a sentence up to 500 characters long that describes what you want to generate in an image, including any details.

- Portrait photo of a small dog in a teacup
- Silhouette of a giant butterfly, starry indigo night sky, 4k, high definition, art station, spiritual, foggy mist, transcendental, symbolic, dream, magical, volumetric lighting, abstract
- Futuristic factory with robotic arms, artstation, hd, volumetric, lighting, fog, 4k
- A dream of a living room, hd, 4k, artstation, volumetric lighting, trending, photograph, ethereal, fog
- Genie in a bottle, artstation, hd, volumetric lighting, fog, 4k, magical, ethereal, spiritual

Negative Prompting

Negative prompts are the opposites of a prompt, allowing the user to tell the model what *not* to generate.

- You can easily give negative prompts a try in DreamStudio by appending:
| <negative prompt>: -1.0
to the prompt.
- For instance, appending:
| disfigured, ugly:-1.0, too many fingers:-1.0
occasionally fixes the issue of generating too many fingers.

Multi-Prompting

Multi-prompts use the concept of prompt weighting. Users can prompt the model to have more or less of certain elements in a composition.

- Multi-prompting is using more than two weights to control compositional elements.
- Starting with a standard prompt and then refining the overall image with prompt weighting to increase or decrease compositional elements gives users greater control over image synthesis.
- A weight of “1” is full strength. A weight of “-1” is full negative strength. To reduce a prompt’s influence, use decimals.

Photorealism

an african woman with a turban smiles at the camera, pexels contest winner, hurufiyya, smiling young woman, face is wrapped in a black scarf, a cute young woman, loosely cropped, beautiful girl, acting headshot : 6 | fox in a lab coat, extra limb, from scene from twin peaks, brutalist futuristic interior, retro futurism, dramatic nautical scene, ornate hospital room, crumbling masonry, pale blue armor, mechanical paw, laser guns, pulp sci fi, two deer wearing suits : -2
